BUILDING & MAINTENANCE

**AN Building & Maintenance is a building company with a difference: the company is run by architectural designers. Architects like working with us because we speak their language, while owners and residents benefit from our expert knowledge in creating residences that serve and support them.**

We have been refurbishing and maintaining some of London's finest residences in collaboration with renowned architects for years. We employ a dedicated team of specialists to cover all aspects of the process – from the most complex architectural detail to the latest in home technology – delivering work on time and to budget.
